CONTENTS.

PAPERS READ BEFORE THE CHEMICAL SOCIETY.

PAGE

I.—Sulphocamphoric Acid and other Derivatives of Camphorsulphonic Acid. By ARTHUR LAPWORTH, D.Sc., and FREDERIC STANLEY KIPPING, Ph.D., D.Sc. 1

II.—The Explosion of Acetylene with less than its Own Volume of Oxygen. By WILLIAM ARTHUR BONE and JOHN CANNELL CAIN 26

III.—The Direct Union of Carbon and Hydrogen. By WILLIAM ARTHUR BONE and DAVID SMILES JERDAN 41

IV.—Electrical Conductivity of Diethylammonium Chloride in Aqueous Alcohol. By JAMES WALKER, Ph.D., D.Sc., and FRED. J. HAMBLY, F.I.C. 61

V.—Experimental Methods employed in the Examination of the Products of Starch-hydrolysis by Diastase. By HORACE T. BROWN, F.R.S., G. HARRIS MORRIS, Ph.D., and J. H. MILLAR 72

VI.—Specific Rotation of Maltose and of Soluble-Starch. By HORACE T. BROWN, F.R.S., G. HARRIS MORRIS, Ph.D., and J. H. MILLAR 109

VII.—The Relation of the Specific Rotatory and Cupric-reducing Powers of the Products of Starch-hydrolysis by Diastase. By HORACE T. BROWN, F.R.S., G. HARRIS MORRIS, Ph.D., and J. H. MILLAR 115

VIII.—Synthesis of Pentacarbon Rings. Part I. Anhydracetonebenzil and its Homologues. By FRANCIS ROBERT JAPP, F.R.S., and GEORGE DRUCE LANDER, B.Sc. 123

IX.—Synthesis of Pentacarbon Rings. Part II. Condensation of Benzil with Acetonedicarboxylic Acid. By FRANCIS ROBERT JAPP, F.R.S., and GEORGE DRUCE LANDER, B.Sc. . 139

X.—Synthesis of Pentacarbon Rings. Part III. Condensation of Benzil with Lævulic Acid. By FRANCIS ROBERT JAPP, F.R.S., and THOMAS SMITH MURRAY, D.Sc. 144

XI.—Reduction of Desyleneacetic Acid, and the Constitution of Zinin's Pyroamaric Acid. By FRANCIS ROBERT JAPP, F.R.S., and GEORGE DRUCE LANDER, B.Sc. 154

PAGE

XII.—The Reduction of Xylic Acid, of Paraxylic Acid, and of Methylterephthalic Acid, and the preparation of Methylterephthalic Acid and of Methylisophthalic Acid. By William Henry Bentley and William Henry Perkin, Jun. 157

XIII.—Observations on the Oxidation of Nitrogen Gas. By Lord Rayleigh 181

XIV.—Derivatives of Maclurin. Part II. By Arthur George Perkin, F.R.S.E. 186

XV.—Camphoroxime. Part I. Conversion of Camphoroxime into Methylcamphorimine and into Camphenylnitramine. By Martin O. Forster, Ph.D. 191

XVI.—Formation of Substituted Oxytriazoles from Phenylsemicarbazide. By George Young, Ph.D., and Henry Annable, Firth College, Sheffield. 200

XVII.—Researches in the Stilbene Series. I. By John J. Sudborough, Ph.D., D.Sc. 218

XVIII.—Diortho-substituted Benzoic Acids. Part III. Hydrolysis of Substituted Benzamides. By John J. Sudborough, Percy G. Jackson, and Lorenzo L. Lloyd 229

XIX.—The Refraction Constants of Crystalline Salts. By Alfred Edwin Tutton 235

XX.—Derivatives of α-Hydrindone. By Cecil Revis, Assoc. C.G.I., and Frederic Stanley Kipping, Ph.D., D.Sc. . 238

XXI.—The Amyl (Secondary Butyl Methyl) Derivatives of Glyceric, Diacetylglyceric, and Dibenzoylglyceric Acids, Active and Inactive. By Percy Frankland, Ph.D., B.Sc., F.R.S., and Thomas Slater Price, B.Sc., late Priestley Scholar in Mason College, Birmingham 253

XXII—The Solution-density and Cupric-reducing Power of Dextrose, Levulose, and Invert-Sugar. By Horace T. Brown, F.R.S., G. Harris Morris, Ph.D., and James Hill Millar 275

XXIII.—Researches on the Terpenes, VII. Halogen Derivatives of Camphor and their Reactions. By James Ernest Marsh and John Addyman Gardner 285

XXIV.—Supposed Condensation of Benzil with Ethylic Alcohol. A Correction. By Francis Robert Japp, F.R.S. . . 297

XXV.—Presence of Gold in Natural Saline Deposits and Marine Plants. By Archibald Liversidge, LL.D., F.R.S., Professor of Chemistry in the University of Sydney 298

XXVI.—Production of Pyridine Derivatives from Ethylic β-Amidocrotonate. By John Norman Collie, Ph.D., F.R.S. . 299

XXVII.—Oxidation of Phenylstyrenyloxytriazole. By George Young, Ph.D., Firth College, Sheffield 311

XXVIII.—Formation of Dithionic Acid by the Oxidation of Sulphurous Acid with Potassium Permanganate. By Thomas S. Dymond and Frank Hughes 314

PAGE

XXIX.—Apparatus for "Steam Distillation." By Francis Edward Matthews 318

XXX.—Contributions to the Knowledge of the β-Ketonic Acids. Part III. By Siegfried Ruhemann, Ph.D., M.A. . . 323

XXXI.— Contributions to the Knowledge of the β-Ketonic Acids. Part IV. By Siegfried Ruhemann, Ph.D., M.A., and A. S. Hemmy, B.A., M.Sc., Hutchinson Student of St. John's College 329

XXXII.—Contributions to the Knowledge of the β-Ketonic Acids. Part V. By Siegfried Ruhemann, Ph.D., M.A., and A. S. Hemmy, B.A., M.Sc. 334

XXXIII.—The Nitrites of Mercury and the Varying Conditions under which they are formed. By P. C. Rây, D.Sc. (Edin.). 337

XXXIV.—Crystallography of the Monhydrated Mercurous Nitrite. By Thomas H. Holland, A.R.C.S., F.G.S., Deputy-Superintendent, Geological Survey of India . . 346

XXXV.—Mercury Hyponitrites. By P. C. Rây, D.Sc. (Edin.) 348

XXXVI.—Contributions to our Knowledge of the Aconite Alkaloids. Part XIV.—On Pseudaconitine. By Wyndham R. Dunstan, M.A., F.R.S., and Francis H. Carr, A.I.C., Salters' Company's Research Fellow in the Laboratories of the Scientific Department of the Imperial Institute . . 350

XXXVII.—The Viscosity of Mixtures of Miscible Liquids. By Thos. Edward Thorpe, LL.D., F.R.S., and Jas. Wyllie Rodger, Assoc. R.C.S. 360

XXXVIII.—A New Synthesis in the Sugar Group. By Henry J. Horstman Fenton, M.A. 375

XXXIX.—The Freezing Points of Alloys containing Zinc and another Metal. By Charles Thomas Heycock and Francis Henry Neville 383

XL.—The Di-nitrosamines of Ethyleneaniline, the Ethylenetoluidines, and their Derivatives. By Francis E. Francis, Ph.D., B.Sc., Lecturer in Chemistry, University College, Bristol 422

XLI.—Dissociation-pressure of Alkylammonium Hydrosulphides. By James Walker, D.Sc., Ph.D., and John S. Lumsden, B.Sc., Ph.D. 428

XLII.—Some Hydrocarbons from American Petroleum. I. Normal and Iso-pentane. By Sydney Young, D.Sc., F.R.S., and George L. Thomas, B.Sc., University College, Bristol. . 440

XLIII.—The Vapour Pressures, Specific Volumes, and Critical Constants of Normal Pentane, with a Note on the Critical Point. By Sydney Young, D.Sc., F.R.S., University College, Bristol 446

PAGE

XLIV.—A Synthesis of Citric Acid. By William Trevor Lawrence, B.A., Ph.D. 457

XLV.—Sodamide and some of its Substitution Derivatives. By Arthur W. Titherley, M.Sc., Ph.D. 460

XLVI.—Rubidamide. By Arthur W. Titherley, M.Sc., Ph.D. 469

XLVII.—Observations on the Properties of some Highly Purified Substances. By William Ashwell Shenstone, Lecturer on Chemistry in Clifton College 471

XLVIII.—Velocity of Urea Formation in Aqueous Alcohol. By James Walker, Ph.D., D.Sc., and Sydney A. Kay, B.Sc. 489

XLIX.—Action of Diastase on Starch. Third Notice. By Arthur R. Ling and Julian L. Baker 508

L.—Studies on the Chemistry of Nitrogen. Enantiomorphous forms of Ethylpropylpiperidonium Iodide. By Clare de Brereton Evans 522

LI.—Magnesium Nitride as a Reagent. By H. Lloyd Snape, D.Sc., Ph.D. 526

LII.—Laurent's Amarone. By H. Lloyd Snape, D.Sc., Ph.D., and Arthur Brooke, Ph.D. 528

LIII.—The Wide Dissemination of some of the Rarer Elements, and the Mode of their Association in Common Ores and Minerals. By Walter Noel Hartley, F.R.S., and Hugh Ramage, A.R.C.S.I., F.I.C. 533

LIV.—On the Spectrographic Analysis of some Commercial samples of Metals, of Chemical Preparations, and Minerals from the Stassfurth Potash Beds. By W. N. Hartley, F.R.S., and Hugh Ramage, F.I.C., A.R.C.Sci.I., Royal College of Science, Dublin 547

LV.—The Atomic Weight of Carbon. By Alexander Scott, M.A., D.Sc. 550

LVI.—A New Series of Mixed Sulphates of the Vitriol Group. By Alexander Scott, M.A., D.Sc. 564

LVII.—Solution and Pseudo-solution. Part III. The Electrical Convection of certain Dissolved Substances. By Harold Picton and S. Ernest Linder 568

LVIII.—Action of Alkyl Haloids on Aldoximes and Ketoximes. By Wyndham R. Dunstan, F.R.S., and Ernest Goulding, Assistant Chemist in the Laboratories of the Scientific Department of the Imperial Institute 573

LIX.—Note on Wechsler's Method for the Separation of Fatty Acids. By Arthur W. Crossley, M.Sc., Ph.D. . . 580

LX.—Researches on the Oxides of Cobalt. Cobalt Dioxide or Cobaltous Anhydride, Cobaltous Acid and Cobaltites. By Arthur H. McConnell and Edgar S. Hanes . . . 584

PAGE

Annual General Meeting 591

LXI.—Explosion of Chlorine Peroxide with Carbonic Oxide. By Harold Baily Dixon, M.A., F.R.S., and Edward John Russell, B.Sc. 605

LXII.—Hydrolysis of Perthiocyanic Acid. By F. D. Chattaway, M.A., Christ Church, and H. P. Stevens, B.A., St. John's College, Oxford 607

LXIII.—Monochlorodiparaconic Acid. By Henry C. Myers . 614

LXIV.—Halogen-substituted Acidic Thiocarbimides, and their Derivatives; a Contribution to the Chemistry of the Thiohydantoins. By Augustus Edward Dixon, M.D. . 617

LXV.—On the Circumstances which Affect the Rate of Solution of Zinc in Dilute Acids, with Especial Reference to the Influence of Dissolved Metallic Salts. By John Ball, Ph.D., A.R.S.M. 641

LXVI.—The Composition of Cooked Fish. By Miss Katharine I. Williams, Associate of University College, Bristol . 649

LXVII.—Oxidation Products of $\alpha\gamma$-Dimethyl-α'-chloropyridine. By Miss Emily Aston, B.Sc., and J. Norman Collie, Ph.D., F.R.S. 653

LXVIII.—Corydaline. Part V. By James Johnston Dobbie, M.A., D.Sc., and Fred. Marsden, Ph.D., M.Sc. 657

LXIX.—The Reactions between Lead and the Oxides of Sulphur. By Henry C. Jenkins and Ernest A. Smith, Metallurgical Department, Royal College of Science, London . . . 666

LXX.—The Action of Bromodiphenylmethane on Ethylic Sodioacetoacetate. By George Gerald Henderson, D.Sc., M.A., and Matthew Archibald Parker, B.Sc. 676

LXXI.—Some New Gold Salts of Hyoscine, Hyoscyamine, and Atropine. By Hooper Albert Dickinson Jowett, D.Sc. 679

Pasteur Memorial Lecture. By Percy Frankland, Ph.D., B.Sc., F.R.S., Professor of Chemistry in Mason College, Birmingham 683

LXXII.—Dalton's Law in Solutions (Molecular Depression of Mixtures of Two Non-electrolytes). By Meyer Wilderman, Ph.D. 743

LXXIII.—Thermal Phenomena attending the Change in Rotatory Power of freshly prepared Solutions of certain Carbohydrates, with some Remarks on the Cause of Multirotation. By Horace T. Brown, F.R.S., and Spencer U. Pickering, F.R.S. 756

LXXIV.—Thermo-chemistry of Carbohydrate Hydrolysis. By Horace T. Brown, F.R.S., and Spencer U. Pickering, F.R.S. 783

PAGE

LXXV.—Experimental Verification of Van't Hoff's Constant in very Dilute Solution (Law of Molecular Depression). By Meyer Wilderman, Ph.D. 796

LXXVI.—Apiin and Apigenin. By Arthur George Perkin, F.R.S.E. 805

LXXVII.—Rhamnazin. By Arthur G. Perkin, F.R.S.E., and H. W. Martin 818

LXXVIII.—The Molecular Refraction of Dissolved Salts and Acids. Part II. By Dr. John Hall Gladstone, F.R.S., and Walter Hibbert, F.I.C. 822

LXXIX.—Reduction of Perthiocyanic Acid. By F. D. Chattaway, M.A., Christ Church, and H. P. Stevens, B.A., St. John's College, Oxford 833

LXXX.—Production of some Nitro- and Amido-hydroxypicolines. By A. Lapworth, D.Sc., and J. Norman Collie, Ph.D., F.R.S. 838

LXXXI.—Connection between the Crystallographical Characters of Isomorphous Salts and the Atomic Weight of the Metals contained. A Comparative Crystallographical Study of the Normal Selenates of Potassium, Rubidium, and Cæsium. By Alfred Edwin Tutton, Assoc. R.C.S. . . . 846

LXXXII.—The so-called Hydrates of Isopropylic Alcohol. By Thos. Edward Thorpe, LL.D., F.R.S. 920

LXXXIII.—The Theory of Osmotic Pressure and the Hypothesis of Electrolytic Dissociation. By Holland Crompton 925

LXXXIV.—Molecular Rotations of Optically Active Salts. By Holland Crompton 946

LXXXV.—Heats of Neutralisation of Acids and Bases in Dilute Aqueous Solution. By Holland Crompton . . . 951

LXXXVI.—Optical Inversion of Camphor. By Frederic Stanley Kipping, Ph.D., D.Sc., and William Jackson Pope . . 956

LXXXVII.—Derivatives of Camphoric Acid. Part II. Optically Inactive Derivatives. By Frederic Stanley Kipping, Ph.D., D.Sc., and William Jackson Pope 962

LXXXVIII.—Racemism and Pseudoracemism. By Frederic Stanley Kipping, Ph.D., D.Sc., and William Jackson Pope 989

LXXXIX.—The Carbohydrates of the Cereal Straws. By C. F. Cross, E. J. Bevan, and Claude Smith 1001

XC.—On the Properties of Nitrobenzene. By Richard J. Friswell 1010

XCI.—A Space Formula for Benzene. By J. Norman Collie, Ph.D., F.R.S. 1013

XCII.—The Isomeric Dibromethylenes. By Thomas Gray, B.Sc. 1023

PAGE

XCIII.—Camphoroxime. Part II. The Ethers of Camphoroxime. By Martin Onslow Forster, Ph.D. 1030

XCIV.—The Action of Nitrogen Trioxide and Tetroxide on Alcohols. Part I. By Julius Berend Cohen, Ph.D., and Harry Thornton Calvert, B.Sc., The Yorkshire College . 1050

XCV.—The Action of Nitrogen Tetroxide on Ortho- and Para-nitrobenzylic Alcohols. By Julius Berend Cohen, Ph.D., and William Hudson Harrison, B.Sc., The Yorkshire College 1057

XCVI.—The Action of Aromatic Amines on Diacetyltartaric Anhydride. By Julius Berend Cohen, Ph.D., and William Hudson Harrison, B.Sc., The Yorkshire College . . 1060

XCVII.—Interaction of Ethylenic Chloride, Ethylic Malonate, and Sodium Ethoxide. By Bevan Lean, D.Sc., B.A., and Frederic H. Lees 1062

XCVIII.—Studies on Citrazinic Acid. Part V. By William James Sell, M.A., F.I.C., and Frederick William Dootson, B.A. 1068

XCIX.—The Condensation of Chloral with Resorcinol. (Second Communication.) By John Theodore Hewitt, M.A., D.Sc., Ph.D., and Frank G. Pope 1084

C.—On β-Oxycellulose. By Benjamin Samuel Bull, M.A., B.Sc., Ph.D., A.I.C. 1090

CI.—On the Action of Sodium Hyponitrite on Mercuric Solutions. By Prafulla Chandra Ray, D.Sc. (Edin.), Professor of Chemistry, Presidency College, Calcutta . . 1097

CII.—On a New Method of Preparing Mercuric Hyponitrite. By Prafulla Chandra Ray, D.Sc. (Edin.), Professor of Chemistry, Presidency College, Calcutta 1105

CIII.—A New Synthesis of Phloroglucinol. By David Smiles Jerdan, B.Sc. 1106

CIV.—Phenanthrone. By Francis R. Japp, F.R.S., and Alexander Findlay, M.A., B.Sc. 1115

CV.—The Crystalline Structure of Gold and Platinum Nuggets and Gold Ingots. By A. Liversidge, LL.D., F.R.S. . . 1125

CVI.—The Yellow Colouring Principles of various Tannin Matters. By A. G. Perkin, F.R.S.E. 1131

CVII.—Ammonia and Phenylhydrazine Derivatives of $\alpha\beta$-Dibenzoylcinnamene (Anhydracetophenonebenzil). By Francis R. Japp, F.R.S., and Alfred Tingle, B.Sc. 1138

CVIII.—Derivatives of Cotoin and Phloretin. By Arthur George Perkin and H. W. Martin 1149

CIX.—Azobenzene Derivatives of Phloroglucinol. By Arthur George Perkin 1154

PAGE

CX.—Action of Phosphorus Pentachloride on Fenchone. By JOHN ADDYMAN GARDNER, M.A., and GEORGE BERTRAM COCKBURN, B.A. 1156

CXI.—Ketolactonic Acid and its Homologues. By CHARLES H. G. SPRANKLING, B.Sc. Lond. 1159

CXII.—Synthesis of *i*-Camphoronic Acid. By WILLIAM HENRY PERKIN, jun., and JOCELYN FIELD THORPE 1169

CXIII.—Yellow Colouring Matters obtained from *Rhus rhodanthema*, *Berberis oetnensis*, and *Rumex obtusifolius*. By ARTHUR GEORGE PERKIN, F.R.S.E. 1194

CXIV.—Naphthylcarbamides. By GEORGE YOUNG, Ph.D., and ERNEST CLARK 1200

Obituary Notices 1204
